Coloplast Product Guide
Ostomy, Continence, Wound & Skin Care

Prices effective January 1st, 2013

Making life easier for people with intimate healthcare needs.

Our values are:

- Closeness... to better understand
- Passion... to make a difference
- Respect and responsibility... to guide us

Closeness to all customers makes this possible. We listen to better understand needs, and respond by finding new ways to do things better together. We lead the way by bringing the best ideas first and fast to market in the form of medical devices and service solutions.

Deeply private and personal medical conditions are our focus. Our passion to make a real difference to people's lives is what drives and unites us. Our culture supports high ambitions, and releases the full potential of our own people to achieve them.

We welcome the broader responsibility that comes with leadership - a responsibility to the environment, to society, to our shareholders, and to act with integrity in all we do.
Our values define the way we think and act, both as individuals and as a company.

Body profiles vary. Find the solution that fits yours with the online BodyCheck.

Bodies not only come in all shapes and sizes, they also vary over time.

That's why it's important to check if your existing stoma solution is still an ideal fit, and why we developed online BodyCheck. It's the quick, simple and confidential way to find the solution that's best for you.

Identify your body profile with the online BodyCheck and discover the way to optimal security and skin care.

Find the solution that's absolutely right at www.bodycheck.coloplast.ca

SenSura® Two-Piece Ostomy System - Stoma Sizing Chart

Coloplast ostomy products are packaged in colour-coded boxes for easy product identification.

Two-piece products are packaged in boxes with a coloured stripe on the label. This colour code makes it easy to match the coupling sizes of flanges and pouches.

Colour code		Skin barrier size Diameter or "Foot print"	Coupling size
SenSura Click Two-Piece			
Green	●	110 x 90mm - 4 3/8" x 3.5"	40mm - 1 9/16"
Red	●	120 x 100mm - 4 3/4" x 3 7/8"	50mm - 2"
Blue	●	130 x 110mm - 5 1/16" x 4 3/8"	60mm - 2 3/8"
Yellow	●	140 x 120mm - 5 1/2" x 4 3/4"	70mm - 2 3/4"
SenSura Flex Two-Piece			
Colour code		Skin barrier size Diameter or "Foot print"	Coupling size

Coloplast Ostomy Care

SenSura® Click Two-Piece System

SenSura Click is the two-piece standard in ostomy care, offering a unique audible click-lock security ring. The patented click-lock technology provides the ultimate in security, convenience and simplicity with just a click to lock and a click to unlock. When the click system is locked, the pouch is securely fastened to the skin barrier.
 + = **SenSura® Click**

SenSura Click combines the revolutionary double-layer adhesive with the added security of the click-lock security ring.

Fits individual body shapes
Feels secure

SenSura® Mio responds to natural body movements

Introducing SenSura Mio, a new colostomy appliance designed with an adhesive that is formulated to enhance elasticity and fitting performance. The elastic adhesive is based on BodyFit™ Technology. It is pliable to individual body contours and maintains a secure fit as it responds to natural body movements.

Coloplast Ostomy Care

SenSura® One-Piece Ostomy Systems
SenSura® Mio

SenSura Mio features the new inspection window covering. It combines the discretion of an opaque pouch with the functionality of a transparent pouch.

SenSura Mio is a new colostomy appliance designed with individual body shapes in mind. It features a new elastic adhesive:

• pliable to individual body contours, creating a secure fit

• responsive to natural body movements, maintaining a secure fit
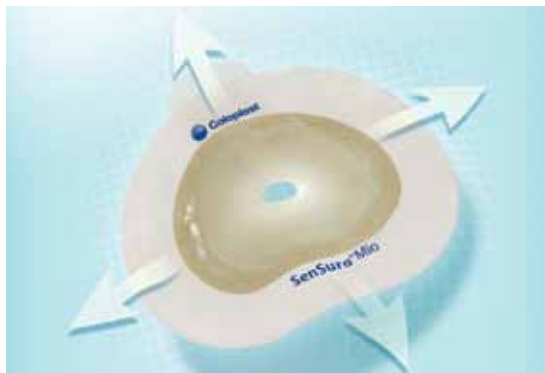

SenSura Mio has a new elastic adhesive.

The elastic adhesive is responsive to natural body movements.

SenSura Mio
Opaque, closed pouch with inspection window.
Only available with filter.

Coloplast Ostomy Care

Assura® Two-Piece Ostomy Systems

Easiclose™ WIDE Outlet Drainable Pouch

Assura Easiclose WIDE Outlet drainable pouches are extremely hygienic and secure for people with colostomies and ileostomies. The WIDE Outlet makes emptying easier for people with thicker output. Slim line filter enhances discretion while controlling odor. Slick interior pouch film also makes emptying easier and faster. Velcro fixation on outlet creates a hygienic pouching solution.

Easiclose Drainable Pouches must be used with the corresponding colour coded skin barrier.

Mini Soft Front Classic Drainable Pouch - 23 cm (9")
Small, opaque, drainable pouch with soft cloth on front and back, and unique Easiclose outlet with integrated filter.

Coloplast Ostomy Care

Easiflex® Two-Piece Ostomy Systems with Adhesive Coupling

Skin Barrier With Flange

The two-piece adhesive coupling system is a great option for a flexible lifestyle. This ostomy pouching system is based on adhesives that make it easy to apply the pouch to the skin barrier- and easy to remove. This pouching system is hygienic, easy to clean, soft and comfortable, safe, and best of all… simple to handle. Easiflex is a great solution for post-operative situations.

Convex Light skin barriers include belt loops.

SenSura Hospital Assortment

SenSura 1-Piece Drainable Pouch

SenSura 1-piece drainable pouch has the features of a post-op appliance, but offers the discretion of a standard pouch. The SenSura 1-piece drainable pouches are connectable with different night bags, come without filter and are available in sterile and non-sterile.

	Sterility	Stoma Size	Volume	Product Code	Units
Cut-to-Fit	Sterile*	10 - 76mm - 3/8"-3"	630 ml	19001	5
	Non-sterile	10 - 76mm - 3/8"-3"	630 ml	19003	6

SenSura Post-Op Pouch

SenSura Post-Op pouch offers easy access to the stoma through a window, which is fixed to the pouch and easy to handle. The SenSura Post-Op pouches are available in sterile and non-sterile, with 70 and 100 mm windows, as well as without window. The soft outlet connects easily to various night bags.

	Sterility	Stoma Size	Window Size	Volume	Product Code	Units
Cut-to-Fit	Sterile*	10 - 76mm - 3/8"-3"	70 mm	680 ml	19010	5
		10 - 76mm - 3/8"-3"	100 mm	725 ml	19011

Coloplast Ostomy Care

Coloplast Support Services

"Every individual is unique and may need to try a number of products to find the best solution"

Change is never easy, but it's important to know you are not alone. For over 50 years it's been our mission to make life easier for people with intimate healthcare needs. That's why we've developed the following programs and services:

Sample Program:
You have unique needs that may require a unique solution. We want to help you find that solution. The Coloplast Sample program provides you with the opportunity to trial our products before purchasing them.

Consumer Support:
You may have a lot of questions. Some might be as simple as finding out where you can purchase your ostomy products, or some might be more intimate. Whatever your questions, we have a knowledgeable, courteous staff to answer your question and provide you with the information and literature you need.

Call **1-866-293-6349** or visit us online at **www.coloplast.ca** to obtain samples or to reach consumer support.

Hours of Operation:
Monday – Friday: 9am – 6pm (EST)

Continence Care

Folysil
Indwelling Foley Catheters

The Folysil 100% silicone indwelling catheter features a significantly larger lumen than latex versions of the same FR size. This helps to reduce obstruction and inhibit encrustation. The larger diameter eyelets allow for better drainage while an atraumatic tip adds to ease of insertion. The Folysil indwelling catheter also features a radiopaque stripe in a transparent shaft for easy detection under x-ray.

Continence Care

Folysil
Indwelling Foley Catheters

The Folysil 100% silicone indwelling catheter features a significantly larger lumen than latex versions of the same FR size. This helps to reduce obstruction and inhibit encrustation. The larger diameter eyelets allow for better drainage while an atraumatic tip adds to ease of insertion. The Folysil indwelling catheter also features a radiopaque stripe in a transparent shaft for easy detection under x-ray.

Continence Care
X-Flow
Prostatic Catheters

Performance and safety

Wide irrigation and drainage channels to prevent blocking. Large bevels and eyes to ensure excellent drainage capacity. Stiff walls to facilitate evacuation.

All silicone, to avoid any risk of allergy or toxicity. Clear catheter body to moitor drainage quality.

Closed round tip for ease of placement of an introducer if needed

Wound Care
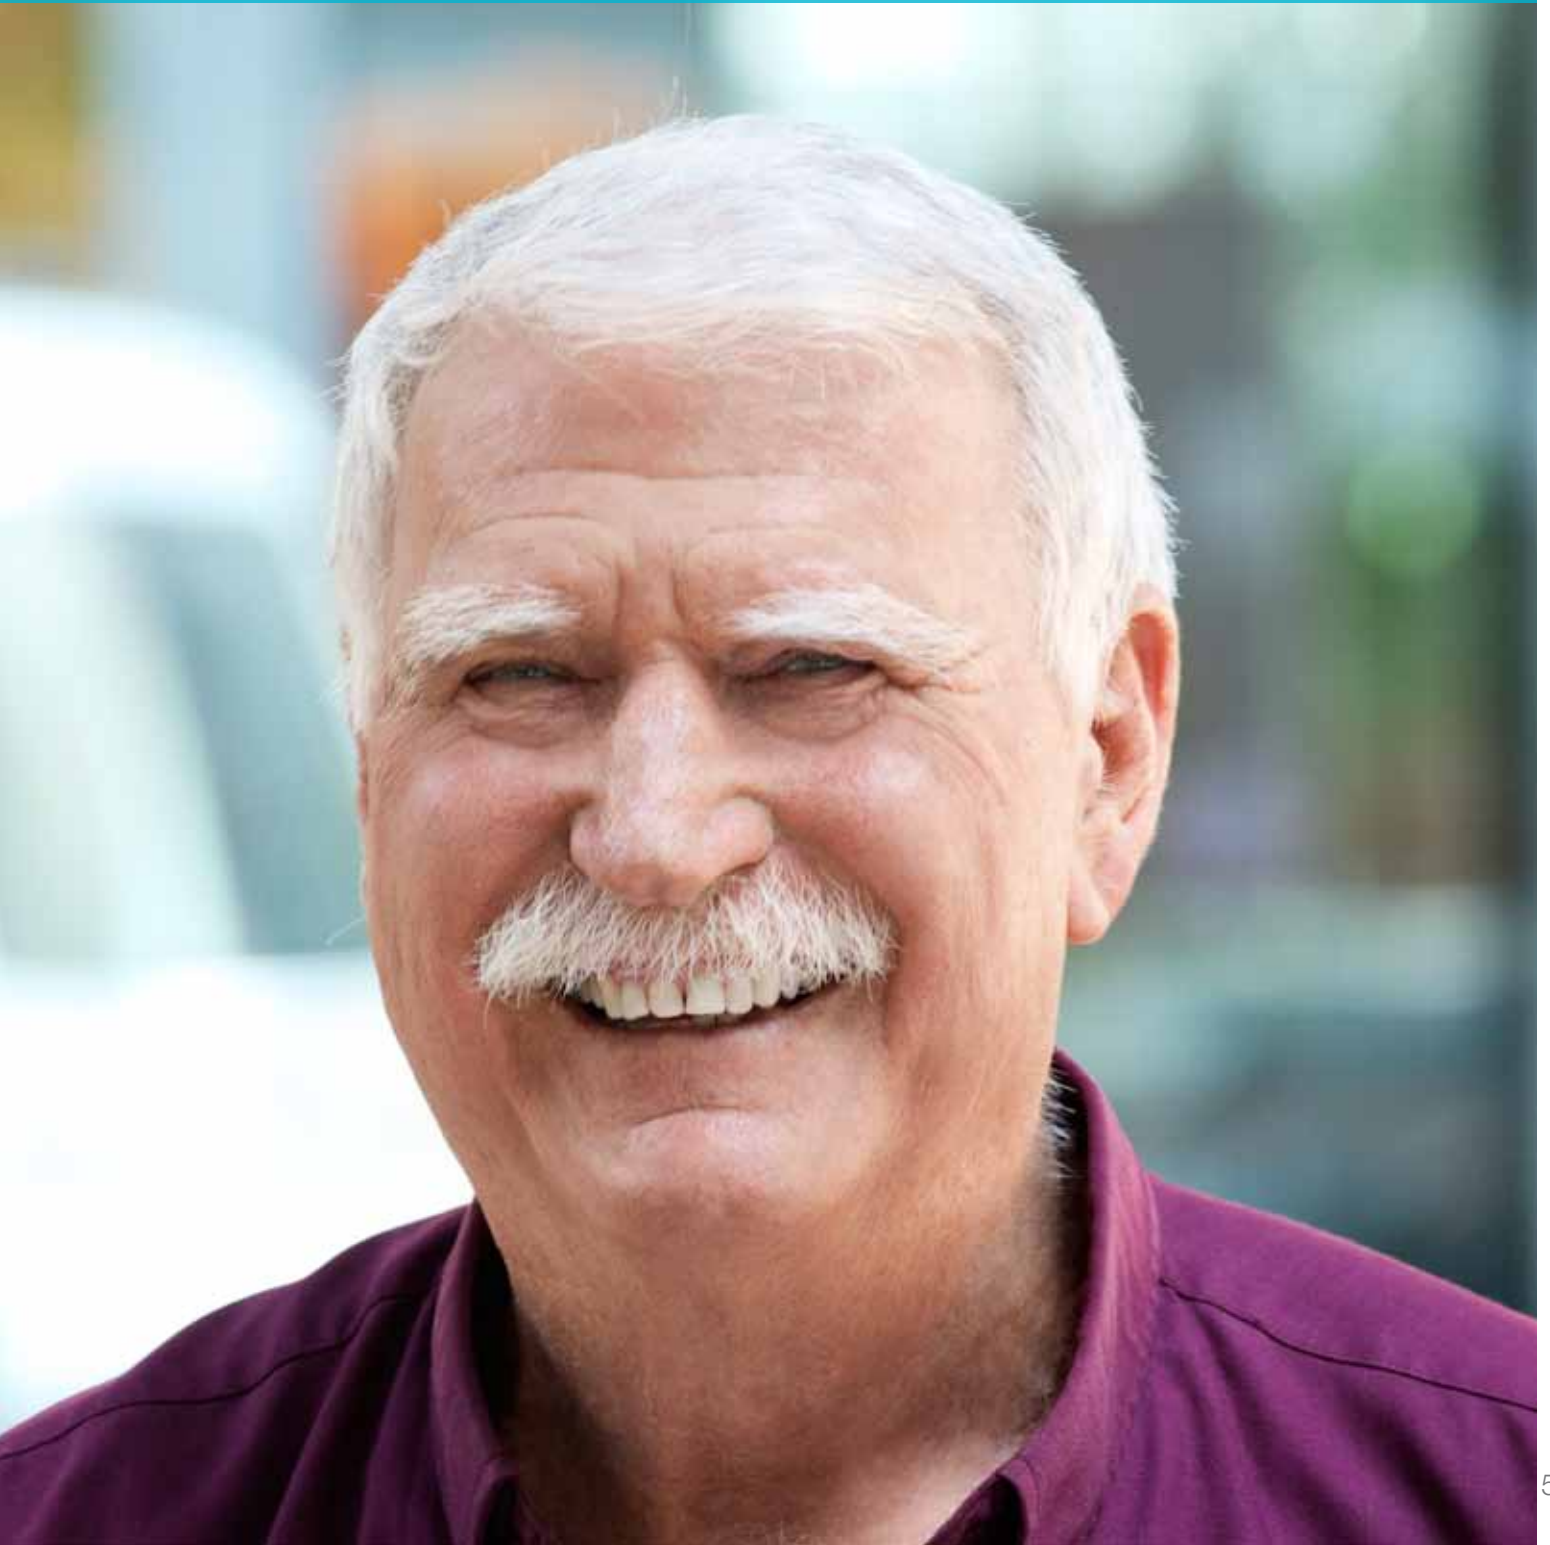

Product Selection Guide

For Medium-High Exuding Wounds

Managing **Exuding** Wounds?

Exuding Wounds   Exuding Wounds with Slough and/or Cavity

Biatain®
- Superior absorption and exudate management - also under compression
- Minimal risk of maceration and leakage
- Soft & conformable foam
- Wear-time is up to 7 days

Biatain® Alginate (formerly SeaSorb® Soft)
- Highly absorbent alginate dressing
- Highly cohesive gel
- Easy one-piece removal
- Wear-time is up to 7 days

+
Biatain Silicone or **Biatain Silicone Lite** as cover dressing

Managing **Exuding** Wounds and **Infection**?

Infected Wounds   Infected Wounds with Slough and/or Cavity

Biatain® Ag
- Superior absorption for infected wounds
- Sustained release of silver during entire wear time (up to 7 days)
- Effective on broad range of bacteria

Biatain® Alginate Ag (formerly SeaSorb® Ag)
- Highly absorbent antimicrobial alginate dressing
- Effective on broad range of bacteria
- Easy one-piece removal
- Wear-time is up to 7 days

+
Biatain Silicone or **Biatain Silicone Lite** as cover dressing

Managing **Exuding** Wounds and **Pain**?

Biatain® Ibu
- Superior absorption and exudate management - also under compression
- Combines moist wound healing with local release of ibuprofen
- Wear-time is up to 7 days

All Coloplast Wound Care products are LATEX-FREE

Wound Care

Biatain®

Superior absorption for faster healing

Biatain foam dressings are proven to provide faster healing of exudating wounds:
• Superior exudate management
• Minimal risk of leakage and maceration
• Long wear time, up to 7 days
• A cost-effective solution
• Packaged in sterile single use packs
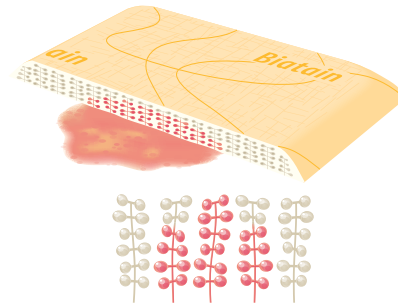

Areas of Use:
• Leg/Vascular ulcers
• Pressure ulcers
• Diabetic foot ulcers
• Traumatic wounds
• Wounds with compromised peri-wound skin

The unique 3-D structure of Biatain serves as a partial fluid lock, retaining the exudate - even under compression therapy. Wound exudate is absorbed locally with minimal lateral dispersal providing an optimal moist wound healing environment.

Foam Dressing

		Size	Product Code	Units
Biatain® Non-Adhesive Foam Dressing • Superior exudate management • Suitable for use on fragile skin due to absence of adhesive		2" x 2.8" (5 x 7 cm)	6105	10
		4" x 4" (10 x 10 cm)	3410	10
		4" x 8" (10 x 20 cm)	3412	5
		6" x 6" (15 x 15 cm)	3413	5
		8" x 8" (20 x 20 cm)	3416	5
Biatain® Adhesive Foam Dressing • Adhesive border based on hydrocolloid technology		3" x 3" (7.5 x 7.5 cm)	3462	10
		4" x 4" (10 x10 cm)	3430	10
		5" x 5" (12.5 x12.5cm)	3420	10
		7" x 7" (18 x 18 cm)	3423	5
Biatain® Adhesive Foam Dressing/Shapes • Specifically designed to conform to difficult to dress areas of the body • The adhesive border is based on hydrocolloid technology	Sacral	7" x 7" (17 x17 cm)	3483	5
	Sacral	9"x 9" (23 x 23 cm)	3485	5
	Heel	7 ½" x 8" (19 x 20 cm)	3488	5

Wound Care

Biatain® Soft-Hold

Superior absorption for faster healing

Biatain foam dressings are proven to provide faster
healing of exudating wounds:
• Superior exudate management
• Minimal risk of leakage and maceration
• Long wear time, up to 7 days
• A cost-effective solution
• Packaged in sterile single use packs

Areas of Use:
• Leg/Vascular ulcers
• Pressure ulcers
• Diabetic foot ulcers
• Traumatic wounds
• Wounds with compromised peri-wound skin
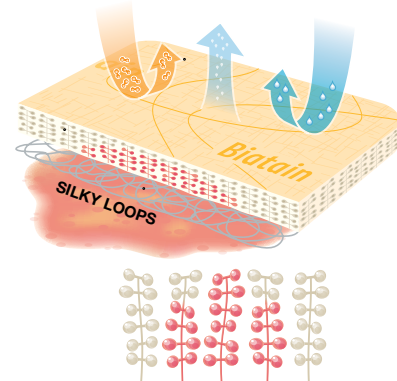

Unique 3-D alveolar structure of Biatain foam serves as a
partial fluid lock, retaining exudate even under compression.
The soft adherent layer minimizes trauma to the wound and
pain to the patient during dressing changes.

Foam Dressing

Biatain® Soft-Hold Foam Dressing
• Soft adherent layer which allows for:
  - Easy Application
  - Easy Removal
  - Skin Protection

Size	Product Code	Units
4" x 4" (10 x 10 cm)	3470	5
4" x 8" (10 x 20 cm)	3472	5
6" x 6" (15 x 15 cm)	3475	5

Wound Care

Biatain® Silicone

Superior absorption for faster healing

Biatain foam dressings are proven to provide faster healing of exudating wounds:
• Superior exudate management
• Minimal risk of leakage and maceration
• Long wear time, up to 7 days
• A cost-effective solution
• Packaged in sterile single use packs

A versatile solution for a wide variety of non-infected moist wounds:
  • Leg ulcers
  • Second degree burns
  • Post operative wounds
  • Non-infected diabetic foot ulcers
  • Donor sites
  • Pressure ulcers*
  • Skin abrasions

NEW

Superior absorption under pressure makes Biatain Silicone the obvious choice in combination with compression therapy.

Foam Dressing with Silicone Border

		Size	Product Code	Units
	Biatain® Silicone Foam Dressing • Superior absorption and exudate management allows for reduced maceration and leakage • Unique foam structure ensures high retention of exudate - also under compression • Soft & conformable foam allows for high patient comfort • Long wear time - up to 7 days • Cost effective solution for exuding wounds	3" x 3" (7.5 x 7.5 cm)	33434	10
		4" x 4" (10 x 10 cm)	33435	10
		5" x 5" (12.5 x 12.5 cm)	33436	10
		6" x 6" (15 x 15 cm)	33437	5
		7" x 7" (17.5 x 17.5 cm)	33438	5

*Except pressure ulcers with a high degree of friction and shear force. In these cases, Coloplast recommends the use of Biatain Adhesive dressings.

Wound Care

Biatain® Ag

Superior absorption for infected wounds

Biatain Ag foam dressings combine superior exudate management with sustained antimicrobial activity for improved patient outcomes. Sustained release of silver assures fast and effective kill against bacterial strains known to be detrimental to wound healing such as Pseudomonas aeruginosa, Staphylococcus aureus and B-haemolytic Streptococcus.
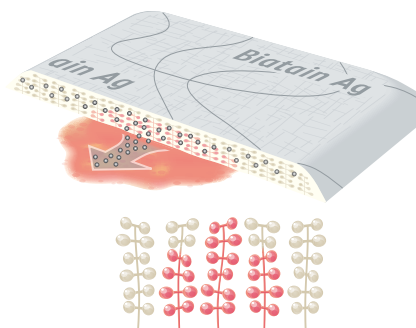

Areas of Use:
• Exudating wounds with delayed healing due to bacteria
• Exudating wounds where there is a risk of infection
• Leg/Vascular ulcers
• Pressure ulcers
• Diabetic foot ulcers
• Second degree burns
• Donor sites
• Postoperative wounds
• Skin abrasions with delayed healing due to bacteria
• Suitable for use in combination with compression therapy

Ionic silver is evenly distributed in the Biatain Ag foam. In the presence of exudate, there is a sustained release of silver into the wound bed throughout the wear time of the dressing. Silver is continuously released for up to 7 days in proportion to the level of exudate within the wound. This ensures an effective control of the local infection which is maintained during the entire wear time.

Antimicrobial Foam Dressing

|		Size	Product Code	Units
Biatain® Ag Non-Adhesive Foam Dressing • Superior exudate management • Suitable for use on fragile skin due to absence of adhesive		2" x 2.8" (5 x 7 cm)	5105	5

*Except pressure ulcers with a high degree of friction and shear force. In these cases, Coloplast recommends the use of Biatain Adhesive dressings.

Wound Care

Biatain® Ibu

Superior absorption for painful wounds

Biatain Ibu combines superior exudates management with the local (nonsystemic) continuous release of ibuprofen for improved patient outcomes.
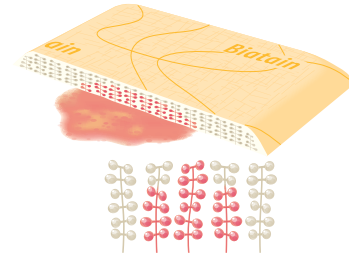

Areas of Use:
• Painful exudating wounds
• Leg/Vascular ulcers
• Pressure ulcers
• Non-infected diabetic foot ulcers
• Second degree burns
• Donor sites (not applicable for Soft-Hold)
• Postoperative wounds
• Skin abrasions
• Suitable for use in combination with compression therapy

Biatain Ibu combines superior exudate management and continuous release of ibuprofen. Biatain Ibu releases ibuprofen locally with no observed systemic effect. In the presence of exudate, there is a sustained release of a low dose of ibuprofen into the wound bed throughout the wear time of the dressing. One dressing (10 x 10 cm) contains 50 mg of ibuprofen which is continuously released for up to 7 days in proportion to the level of exudate.

Foam Dressing with Ibu

		Size	Product Code	Units
Biatain® Ibu Non-Adhesive Foam Dressing • Superior Exudate Management • Suitable for use on fragile skin due to absence of adhesive • Well tolerated with no observed systemic effect		4" x 4" (10 x 10 cm)	4110	5
		4" x 8" (10 x 20 cm)	4112	5
		6" x 6" (15 x 15 cm)	4115	5
		8" x 8" (20 x 20 cm)	4120	5
Biatain® Ibu Soft-Hold Foam Dressing • Gentle adherance minimizes trauma and pain at removal • Sustained release of ibuprofen reduces persistent pain during entire wear time		4" x 4" (10 x 10 cm)	4140	5
		4" x 8" (10 x 20 cm)	4142	5

Wound Care

Biatain® Alginate (Formerly SeaSorb®)

Superior absorption for wound with slough and/or cavity

Allows for intact removal, will not stick to healing tissue.
Absorbs, collects and contains exudate while providing a moist healing environment.
Forms a very soft, cohesive and hydrophilic gel. Has haemostatic properties
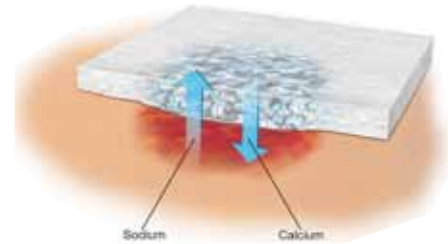

Areas of Use:
- Painful exudating wounds
- Moderate to heavily exudating wounds
- Cavity wounds where it should be gently layered into the wound, as the gel will conform to the wound shape
- SeaSorb Ag is indicated for wounds with signs of local infection or critical colonization

Calcium Alginate Dressing

		Size	Product Code	Units
	Biatain® Alginate Ag (Formerly SeaSorb® Ag) • Provides an effective, sustained release of silver against common bacteria for up to 4 days • Reduces odour - Effectively controls bacteria which cause odour • Cost effective - High absorbency results in longer weartime and reduced nursing time	4" x 4" (10 x 10 cm)	3760	10
		1" x 17½" (44 cm) rope	3780	10
	Biatain® Alginate (Formerly Seasorb® Soft) • Forms a very soft cohesive and hydrophilic gel on contact with wound exudate • Ideal for moderate to highly exuding wounds • Easy, one piece removal minimizes pain at dressing change	2" x 2" (5 x 5 cm)	3705	30
		4" x 4" (10 x 10 cm)	3710	10
		6" x 6" (15 x 15 cm)	3715	10
		1" x 17½" (44 cm) rope	3740	6

New size

Wound Care

Comfeel® Plus

Hydrocolloid Dressing

Comfeel Plus hydrocolloid dressings change colour as they absorb exudate. This helps determine the optimal time for dressing change. As exudate is absorbed, a moist gel forms, and the dressing begins to turn white. Maximum absorbency has been reached when the dressing becomes opaque or when exudate extends to within ½" of the edges.
Polyurethane top film allows excess moisture to evaporate while maintaining a moist environment for optimal wound healing.

Areas of Use:
- Management of low to moderately exudating leg and pressure ulcers
- Superficial burns
- Post-operative wounds
- Superficial partial-thickness burns
- Skin abrasions

Hydrocolloid Dressing

		Size	Product Code	Units
	Comfeel® Plus Ulcer Dressing • Combines a highly absorbent sterile hydrocolloid with an alginate for superior exudate management, for use up to 7 days • Grid imprint on the polyurethane top film facilitates wound measurement • Tapered edges minimize edge roll	1½" x 2½" (4 x 6 cm)	3146	30
		4" x 4" (10 x 10 cm)	3110	10
		6" x 6" (15 x 15 cm)	3115	5
		8" x 8" (20 x 20 cm)	3120	5
	Comfeel® Plus Sacral (Triangle) • Specially designed for use in the sacral area • Thin, tapered edges increase wear time by preventing edge roll • Grid imprint allows convenient, accurate measurement of the wound area	7" x 8" (18 x 20 cm)	3285	5
	Comfeel® Plus Transparent Dressing (Formerly Comfeel Plus Clear Dressing) • Transparency allows for wound inspection without dressing change • Ideal for friction management • Low profile design minimizes edge roll	2" x 2 ¾" (5 x 7 cm)	3530	10
		4" x 4" (10 x 10 cm)	3533	10
		3½" x 5½" (9 x 14 cm)	3536	10
		6" x 6" (15 x 15 cm)	3539	5

Application and Cutting Guide

Application

Biatain, Biatain Ag & Biatain Ibu Non-Adhesive Foam Dressings
The dressing must be applied with the plain (non-printed) side towards the wound.

Biatain & Biatain Ibu Soft-Hold Foam Dressings
Remove the protective film and apply the dressing with the plain (non-printed) side towards the wound.

Biatain & Biatain Ag Adhesive Foam Dressings
Use the handles to prevent touching the dressing and to ensure aseptic application. Remove the protective film first and place the foam part of the dressing over the wound. Then remove the release films on the sides as part of the dressing application.

Biatain & Biatain Ag Adhesive Foam
Dressings/Sacral
Use the handles to ensure aseptic application. Remove the center protective film. Place the narrow end of the dressing as far down over the wound as possible and fix the dressing working up and outwards. Remove the handles.

Biatain & Biatain Ag Adhesive Foam Dressings/Heel
Use the handles to ensure aseptic application. Remove the center protective film. The dressing is shaped like an "arrow". Fold the dressing in a 90° angle between the "arrow head" and "arrow tail". Let the "arrow" point away from the heel tip and fix the "arrow tail" first. Secondly, fix the "arrow head". Remove the handles one by one and fix the sides carefully, in order that the foam parts touch or overlap.

Removal

To remove the dressing, gently lift the corners of the dressing away from the wound.

To remove the adhesive dressings, it is recommended to loosen the adhesive border before lifting the dressing away from the wound.

Biatain Adhesive Foam Dressing/Sacral should be removed from the top edge and down towards the anus to minimize the risk of transmitting infection.

General Notes:

Disclaimer: These are general guidelines, please check local treatment recommendations applicable in your country or healthcare institution.

• Always check the cause of the wound.

• Follow your local infection control guidelines to prevent cross infection.

• Please make sure to use a pair of sharp clean scissors.

• Always remember to cut across the peel back, otherwise the backing paper will be difficult to remove.

• When cutting dressings always round off the edges for better adhesion.

• For adhesive dressings keep the backing film as a template for next application on your patient. For non-adhesive dressings draw a template on the pouch.

• Most manufacturers recommend placing the dressing over the centre of the wound. Consider the effect of gravity and apply the dressing to account for the direction of fluid drainage.

• Do not apply dressings with tension as this may cause blistering.

• Although some dressings might provide padding and reduction in friction, they do not relieve pressure.

• For all joints, the principles of application are similar. Examples given here on heels, elbows and knees may be used on any of these joints.

Wound Care

Washing hands

Always remember to wash your hands before and after the application of a dressing.

Please use your recommended dressing technique according to infection control guidelines.

Disclaimer: These are general guidelines, please check local treatment recommendations applicable in your region or healthcare institution.

Use a thin hydrocolloid (5 x 7 cm), cut into a strip, fold in half lengthways, then cut a 'fringe' along one edge (the cuts should be approximately 0.5 cm apart). Apply the uncut edge of the dressing first, and use the cut edges to fold around the shape of the ear. If the wound is wet, use a small piece of alginate underneath.

Ears

For wounds caused in the area where oxygen tubing or foam rubs on the ears, cut half way into a thin hydrocolloid (the piece should be approx (2 x 3 cm), anchor to the flat of the head with the uncut half, and then put the other two sections around the ear. These can also be adapted for the nasal region.

Ears

Use a Non-adhesive or a Soft-Hold dressing for this kind of wound. Cut the dressing in order to fix the size of the ear. Chose a suitable secondary dressing to keep the dressing in place.

Ears

Cut two small slits in the dressing and apply it, mould the slit around the elbow. Remember to apply the dressing with the patient bending the arm in a 90° angle.

Elbows

Use 3 strips of thin hydrocolloid. With the joints at an angle of 90° apply the first strip directly over the angle of the joint. Apply the second strip overlapping one edge approximately 30° to the first strip. Apply the third strip over the other edge of the first strip in the same way. Cup the dressing firmly to mould the shape of the joint. If the wound is wet, a foam dressing is more suitable.

Elbows

Use for the hallux toe and for inter-digital ulcers, secure with a secondary dressing.

Bunion

Cut a dressing and use it for interdigital wounds. The dressing must be secured with a secondary dressing.

Toes

Use for the tip of the toes and for inter-digital ulcers, secure with tubular gauze.

Toes

Cut a "bow-tie" shaped thin hydrocolloid dressing. Use the slimmest dressing possible considering footwear. Often a non-adhesive dressing with separate fixation will work better than an adhesive dressing due to the pressures applied to the feet on walking.

Toes

For wet wounds use a foam dressing. Additional fixation is required.

Toes

For margin of hand, cut one slit towards the edge of the dressing. Apply over the first or fifth digit (as appropriate). To anchor the dressing mould the remaining dressing to the hand. Where there is fungal infection present, a silver-containing foam dressing is appropriate.

Hands

For wounds between the fingers cut a dressing and slide onto the finger. Use a secondary dressing to secure the foam dressing.

Fingers

For small wounds on and between fingers a thin hydrocolloid dressing can easily be cut into small strips to fit the wound.

Fingers

For multiple digits.

Fingers

There is a variety of different heel dressings available, consider which of these shapes is best for your patient.

Heels

A heel dressing may be a good solution for dressing the axilla area. Keep the direction of fluid in mind and apply the largest part of the dressing as illustrated on the photo.

Axilla

Particularly suitable for women. Cut according to the size of breast

Sternum

When the wound is close to an ostomy, care needs to be taken when deciding whether to apply the stoma base plate on top or underneath the dressing.

Peristoma wounds

Bottoms are considerable in size shape and skin texture. General principles for management include: Use the slimmest dressing possible. There is a variety of different sacral dressings available, consider which of these shapes is best for your patient's bottom. Please ensure that you differentiate between pressure ulcers and moisture lesions, as the supporting management differs greatly.

Sacral

If the wound is wet, use e.g. a foam and/or an alginate dressing (the alginate dressing requires a secondary dressing).

Sacral

Skin Care

Simplify Skin Care

ALL PATIENTS

Step 1: Gently Cleanse Using a Mild pH Balanced Cleanser

Sproam® Cleanser

All Body Cleansing
- » Add 2-3 pumps onto a warm moist washcloth and cleanse
- » Gently pat dry

Shampooing
- » Dampen hair, add 2-3 pumps directly on to dampened hair
- » Gently massage into hair and scalp for 30-60 seconds
- » Rub gently with a moist washcloth to remove dirt and oils

Incontinence Cleanup
- » Add 2-3 pumps on a warm moist washcloth, and cleanse
- » If feces, spray 2-3 pumps directly onto soiled area, wait 30 seconds and wipe off using a warm moist washcloth

Step 2: Moisturize All Patients/Residents

Sween® Lotion Unscented
- » Moisturizing body lotion with natural vitamin E
- » For all dry skin areas
- » Gently apply a small amount of lotion to patient's skin

INCONTINENCE

Step 3: Minimize Skin Exposure To Moisture From Incontinence

Critic-Aid® Clear
- » Gently clean the perineal area and apply a thin layer of **Critic-Aid® Clear** evenly over the entire area to be protected

MOISTURE CONTROL

Moisture Control in Skin Folds

InterDry® - Textile with Antimicrobial Silver Complex
- » Wicks away moisture; keeping skin dry
- » Helps relieve maceration, denudement, inflammation, itching, erythema and satellite lesions
- » Provides effective antimicrobial action for up to five days
- » Reduces odour commonly associated with skin folds
- » Place **InterDry®** between skin folds; leaving at least two inches of the textile outside the skin fold

Terms and Sales Policy- Prices Effective 01/01/2013

ALL SALES ARE SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

PRICE: This price list supersedes all previous price lists. Coloplast Canada reserves the right to revise prices at any time; however, we do attempt to provide the trade with reasonable notification of any changes.

TERMS: Net 30 Days from invoice date to the date payment is post-marked (excluding C.O.D. and Visa/MC orders). No shipments will be released to accounts past due. If payment is not received when due, the invoice is subject to a monthly service charge equal to one and a half percent (1-1/2%) of the unpaid balance.

MINIMUM ORDER: Orders less than $250 are subject to freight charges and a $25 handling charge. Orders for Urology products are exempt from the $250 minimum; however, a $25 handling fee applies to all orders for Urology products.

SHIPPING: Prices are F.O.B. Coloplast Warehouse. Coloplast Canada Corporation pays for ground transportation charges on all orders of net $250 or more to destinations in Canada. No freight will be added on backorders. Orders will be shipped by a carrier of our choice. When special handling is requested, the cost of the special service will be added to the invoice. Orders of less than $250 will be shipped prepaid and freight added to the invoice.

SHIPMENT VERIFICATION: Any discrepancy in the quantity billed and the quantity received resulting from damage (concealed or otherwise), shortages, overages, or wrong product, must be reported to Coloplast Customer Service within 15 days of the date a shipment is received. Any discrepancy reported after 15 days requires Coloplast Management authorization for credit. We will not provide proof of shipment delivery after 90 days. Claims for non-delivery must be notified to Coloplast Customer Service and the Carrier within 15 days from the date of invoice, failing which, Coloplast Canada Corporation shall be under no liability for non-delivery.

INVOICE VERIFICATION: Any discrepancy in an invoiced price and corresponding order price must be reported to Coloplast Customer Service within 30 days of the date of the invoice.
DROP SHIPMENT: All drop shipments are subject to freight charges and a $25 handling fee.

RETURNED GOODS POLICY: Coloplast Canada Corporation will accept returned goods from our customers, for credit or exchange, under the following conditions:
1. All returns must have written authorization from Customer Service, Coloplast Canada Corporation (1-888-880-8605). This authorization is an estimate, pending inspection by Coloplast of returned goods.
2. Credit will not be issued for products returned without proper documents.
3. Returned Merchandise Authorizations are valid for 30 days and product must be received in designated Coloplast location within 30 from date of issue.
4. Full credit will be given for items shipped in error by Coloplast Canada Corporation if returned within 30 days from date of invoice.
5. Full credit, less a 15% restocking fee, will be given for all products returned with proper documentation as long as the following conditions are met:
All returned goods must be in saleable condition with at least three (3) months of shelf life remaining and have been purchased in the last one (1) year. No credit will be issued if the original package integrity is broken, damaged, or if the package is defaced with stickers or markers or if the product is within three (3) months of expiration date. Only full box quantities will be accepted. Credit will not be given for products no longer listed in current Coloplast Canada Corporation price lists or for products that have been replaced by updated versions with significant feature changes or box quantity changes.
6. All returns are subject to Coloplast Canada Corporation inspection. Coloplast Canada Corporation reserves the right to destroy merchandise deemed unfit for sale, whether or not accepted for credit or exchange.
7. Returned goods deemed saleable will be valued at the original cost.
8. Returns must be shipped, prepaid to:

COLOPLAST CANADA CORPORATION
3300 Ridgeway Drive, Unit 12,
Mississauga, ON L5L 5Z9

LIMITED WARRANTY: Coloplast Canada Corporation warrants that all products sold hereunder shall be free from defects in material and workmanship at time of delivery, subject to proper handling, transportation, storage and use of such products. Except as provided above, Coloplast Canada Corporation makes no other warranty, expressed or implied (save for its right to transfer good title to the products), in fact or by law, including any warranty or merchantability or fitness for a particular purpose. All warranties hereunder shall be null and void in the event any alteration of any product is made. The liability of Coloplast Canada Corporation for any product not conforming to such warranty shall be limited to the replacement thereof with a conforming product provided that Coloplast Canada corporation will be so liable unless (1)
Coloplast Canada Corporation received prompt written notice of the defect within ten (10) days from the date of defect was of should have been discovered and (2) if requested by Coloplast Canada Corporation, the nonconforming product is returned to Coloplast Canada Corporation. In no event shall Coloplast Canada Corporation be liable in tort or in contract for direct, incidental or consequential damages of any kind.

CUSTOMER SERVICE: All orders are subject to our Terms and Sales Policies and to final acceptance and approval by our Customer Service Department at 1-888-880-8605. For your convenience, orders are accepted via telefax at 1-877-820-8206.

The Coloplast story began back in 1954.
Elise Sørensen is a nurse. Her sister Thora
has just had an ostomy operation and is afraid
to go out, fearing that her stoma might leak in
public. Listening to her sister's problems, Elise
creates the world's first adhesive ostomy bag.
A bag that does not leak, giving Thora – and
thousands of people like her – the chance to
return to their normal life.

A simple solution with great significance.

Today, our business includes ostomy care,
urology and continence care and wound and
skin care. But our way of doing business still
follows Elise's example: we listen, we learn
and we respond with products and services
that make life easier for people with intimate
healthcare needs.
