DESIGNERS

hanna werning

Hanna Werning is a graphic designer, trained at Central Saint Martins College of Art & Design in London. She spent three years as senior designer at Foundation 33 in London, serving such notable clients as Channel 4, Island Records, MTV and Serpentine Gallery. Before London, Hanna worked at Swedish Television and Moonwalk in Stockholm. Upon returning to Sweden, Hanna opened her own design studio in Stockholm. She has designed textile patterns for Borås Cotton, Eastpak, Dagmar, Boxfresh and Stüssy. Her most famous creations so far are her Animal Flower wallpaper posters. In 2004, Hanna received the Elle Decoration International Design Award for 'Wall Coverings and Wallpaper'.

pascal charmolu

Pascal Charmolu is a French citizen who has lived in Stockholm since 1984. In 1990 he graduated from the industrial department of the Swedish Academy of Art and Crafts in Stockholm. Since then he has freelanced as a designer for many clients in Sweden and elsewhere. Charmolu's products in the Sagaform range are featured in the Project series, which has received great praise in Europe and beyond and has won many design awards and honourable mentions.

jon eliason

Freelance product and interior designer living in Stockholm and trained at Beckmans School of Design. Eliasson has mainly worked with dinnerware products, but his credentials include children's toys, furniture and home-interior makeovers for the television series Room Service. In addition, he has his own artistic glass and ceramic work. His designs are often inspired by nature, history, science and meals.

form us with love

Form Us With Love is a ground-breaking design agency offering creative design solutions for products, furnishings, lighting and interiors. Form Us With Love serves clients from Sweden and around the world from its office and showroom in scenic Old Stockholm. Through exhibitions around the globe, FUWL have wowed the media with their innovative design and have received the prestigious Red Dot Design Award as well as awards from Elle EDIDA and UNG 06/07.

pia amsell

Pia Amsell graduated from Beckmans School of Design, Stockholm in 1995 where she studied furniture and product design. Since then she has been working as an independent designer. The core of her wide range of commissions is textile design, utility goods in glass or ceramics and other products for every day use.

roger persson

Roger Persson is an industrial designer, trained at HDK in Göteborg and have studied furniture design at School of Visual Arts in New York. Since 2000 he is managing together with two colleagues the design studio Stilpolisen in Göteborg. Roger is mainly working with furniture and lamp design but has also designed products in other product areas from toys to electric switches. Designing is for me a play with lines and curves that opens up new design solutions and new functions.

matz borgström

As a DJ he played in and ran clubs in Stockholm since being a teenager, which has given him a huge insight into the bar as an everyday phenomenon. As a designer he has a wealth of experience in developing glassware. And with this experience behind him he has designed CLUB for the discerning drinker who knows that the function of an item is at least as important as the right design. CLUB will appeal to the connoisseur and enthusiastic beginner alike. CLUB offers style, happiness and high quality all in one package. Enjoy!

moritz

Peter and Eva Moritz have had their design and crafts studio in Lund in the south of Sweden since 1998. Their experience covers most production methods and materials. Many of the products are closely tied to human use, often in direct contact with the body, such as cutlery, furniture and jewellery.

ylva olsson

Olsson is educated in applied art and design and her focus is on the ready laid table. A sense of playfulness is key in Olsson's designing. After receiving her master's degree in 2007 at the University of Art and design in Helsinki, she is now running her own design studio in the southern part of Sweden. For Sagaform, Olsson has designed "Animal", a series which consists of bowls where tradition meets present day.

transformer

Transformer is a company consisting of Peter Pinzke and Johan Bergström. Both are trained design engineers from Malmö University and have been creating award-winning product designs, home interiors and service design since the company's start in 2004. To Transformer, design means creating with heart as well as mind; it means surprising and pleasing the viewer without forgetting the ever-important user. For the Sagaform name, Transformer has developed salad utensils and a pasta server with a parmesan grater.

lotta odelius

In the spring of 2006, after ten years as an Art Director and graphic designer, Lotta Odelius established herself as an independent designer. Her first endeavour was the Klyftig collection featuring trivets in four fruity patterns. In cooperation with Sagaform Lotta has added a number of tea towels and potholders to the collection. Lotta strives to create functional products that will inspire and brighten everyday life. Her style is clean, yet playful, with roots in Scandinavian design.

marie olofsson

Product designer Marie Olofsson was trained at Danmarks Designskole in Copenhagen, receiving her degree in 2004. Her degree project involved investigating and searching for special effects with transparent coloured glass. The result was a series of coloured tealight holders, which Sagaform has now decided to produce. She currently lives in Western Sweden with her family and runs her own design agency.

helene tiedemann

Helene Tiedemann studied Industrial Design in London, and later Architecture in Stockholm. She is internationally known both for her distinctive furniture and product designs. Her design language shows humane and sensual, as well as highly functional, qualities. She lives with her family in Stockholm where she runs a design and architectural practice.

björk-forth

Pia O. Björklund and Magnus Forthmeier were trained at the School of Textiles at the University College of Borås and have worked with fashion for a range of Swedish businesses for many years. Since 1997, they have jointly run the Björk-Forth design studio, where they carry out freelance assignments in textile and product design for companies in Sweden and elsewhere. In addition to freelancing, they also create new products in their own collection for the Swedish design company Rotor, primarily from stoneware and textile.

lovisa wattman

Trained industrial designer educated at the Swedish Academy of Arts and Crafts in Stockholm and at the Aarhus Architectural School in Denmark. With a passion for cuisine and cooking, Lovisa has fallen naturally into the art of designing kitchen and tableware. She has been active in this field since she completed her studies, first as an on-staff designer and since 1999 in her own design company.

linda sjunnesson

Linda is a textile and product designer. In recent years, she has had her own business freelancing for companies in Sweden. Linda was trained at the School of Textiles at the University College of Borås and at the School of Design and Crafts at Göteborg University. As a designer, she is constantly inspired by nature and humanity. Linda has designed the Pic-pack series for Sagaform.

åsa lindberg svensson

The Sagaform Mug Collection was designed by Åsa Lindberg Svensson (b. 1972). She joined the design team at Sagaform in 1997, after completing her training at the School of Textiles at the University College of Borås. Åsa has previously designed series like Christmas, Seafood, Egg'n breakfast and Oval Oak.

invivo design

The German designers Dennis Becker and Christoph Wiehle graduated at the industrial design institute of the University of Applied Sciences Magdeburg. After several creative stops in car design and international oriented bureaus they founded their own team invivodesign² in 2003. In the first restless years, while building up the design bureau, they worked for wellknown clients in Germany and Scandinavia. Their demand is to create unusual, nevertheless very clear products – always discovering a second sight.

Thoughtful design

This product shows your sense of form, function and environment. It was made from farmed bamboo, so it does not contribute to the devastation of the world's forests. The production is environmentally friendly. All of the glues and oils used in it are certified and the transportation is made by boat. All this makes it easier for you to shop smart and enjoy your food that much more.

edge

design by pascal charmolu

Laser engraving of your name or logo on metal, wood and leather is also available. Please contact us for further information and prices.

In order to maintain the quality of your knives, we recommend that they not be washed in the dishwasher. EDGE comes in an attractive metal gift box.

Sagaform's EDGE is a unique range of knives and knife sets. Designed by Pascal Charmolu, the clean Japanese lines speak for our clear, functional philosophy.

The EDGE blade is fashioned from high-quality molybdenum/vanadium 1.4116-steel, hardened to Rockwell 53-55 HRC. The distinctive EDGE profile is created by first punching out the blade and then honing its finish. The knives are extremely easy to sharpen, even for the novice. EDGE handles are of hollow 18/8 stainless steel.

EDGE's uniqueness lies in the fact that the blade runs through the entire handle where it is anchored at the back, giving the knife both resilience and strength. Each knife is individually designed to strike a perfect balance between the handle and the size and weight of the blade. To maintain best cutting quality, EDGE knives should not be washed in dishwasher. EDGE comes in a handsome metal gift box.

EDGE Köksknivar

Blad av molybdenum/vanadium 1.4116 stål, 53-55 HRC och handtag av rostfritt 18/8 stål.

ENVIRONMENT AND ETHICS

The environment and ethics have always been important issues for Sagaform.

DEMANDS ON THE SUPPLIERS – code of conduct

New Wave considers showing respect for different countries' legal standards as well as international organisations' view on basic rights as important for customers and suppliers. New Wave must be responsible for its operations in Europe as well as in the rest of the world. We make our ethical and moral points of view clear at all times, as we know that it effects our long-term development and business. Our Code of Conduct is applied to all factories involved in the production of New Wave's products. At the same time as we are aware of the different legal and cultural conditions for factories at different locations, the Code of Conduct states the basic standards that all factories have to live up to if they want to do business with New Wave. Code of Conduct is an agreement that New Wave's suppliers have to enter into and follow. It says that the suppliers have to work according to the law and let New Wave into their factories and data for regular controls. The Code of Conduct contains items like no discrimination, no child labour, salary and working hours, working conditions and the freedom to join unions.

THE ENVIRONMENT

Production and freight have great impact on the environment. Apart from Seger's factory in Sweden and Toppoint's factory in Holland, New Wave owns no production. New Wave works closely with its suppliers when it comes to environmental matters and the Code of Conduct mentioned above contains standards about chemical restrictions made up by Swedens textile importers' chemical guide that suppliers have to follow. Our suppliers must make sure that their suppliers strive to decrease the use of virgin raw material, the discharge of "unnatural" material, waste, air pollution as well as the consumption of energy and fresh water. Apart from Sweden, New Wave has established purchase offices in China, Bangladesh and Vietnam. At these purchase offices, our employees make sure that suppliers live up to New Wave's requirements when it comes to quality, environment and working conditions. New Wave sends samples from the production to independent institutions, like IFP Research and SGS, to make sure that the products do not contain any forbidden material. New Wave makes continuous efforts towards environmental improvements in its ordinary production. The Group has previously phased out most of the use of chlorine bleaching in favour of bleaching using hydrogen peroxide. New Wave invests considerable resources in ensuring that certain carci-

nogenic AZO dyes are not used. Suppliers have also been encouraged to use mechanical shrinking instead of chemical shape stabilisation, in order to avoid formaldehyde residue that may induce allergies. New Wave organises transport from the Far East between different companies as much as possible. New Wave is currently investigating the possibility of transport with trains instead of lorries in Bangladesh. New Wave hardly uses airplane deliveries at all, unless the delivery is very urgent.

WORKING CONDITIONS

For New Wave the working environment and the way in which employees are treated at the suppliers' plants are most definitely included in the term environment. New Wave's personnel perform continuous checks to ensure, for example, that no products are made by child workers. New Wave's suppliers have signed an agreement giving a guarantee that no children are employed in the production process, in accordance with the United Nations' Convention on Rights of the Child¹. The purchasers and our purchase department make active efforts to ensure satisfactory working conditions in the factories with which New Wave conducts business. In several cases, the Group has donated various kinds of protective equipment to factories in developing countries. Although New Wave makes extensive checks, it is difficult to guarantee that no child labour is used and that working conditions are always satisfactory. At unannounced visits, New Wave sometimes uses physicians to make sure that no children are working in the production.

ETHICS

New Wave also wants to play an active role in building a better society for those working in the production plants where the Group's collections are produced. An example of this is the New Wave School, an education program for more than 250 children in Jue Xi in southern China. In Finland, New Wave cooperates with Unicef, by donating some of its sales income from certain products to the organization.

¹ *United Nations Convention on the Rights of the Child, article 32:1: "States Parties recognize the right of the child to be protected from economic exploitation and from performing any work that is likely to be hazardous or to interfere with the child's education, or to be harmful to the child's health or psychological, mental, spiritual, moral or social development."*

New Wave Group members of the Clean Shipping Project

Since October 2008, the New Wave Group is a member of the Clean Shipping Project, a Swedish project fighting for a health and environmental friendly development of the shipping industry. The way the project works is that the members of the project request environmental information from the shipping companies about their ships based on 20 different factors that have an environmental effect. The information is collected in an environmental index, the Clean Shipping Index, where entire shipping companies can be evaluated based on their environmental qualities. The information can then be used when procuring transportation in order to put pressure on the shipping companies to make their ships more environmentally friendly. Also non members and privies outside Sweden can use the index. A future goal is to have international transportation buyers unite and put pressure on the shipping industry also.

As it is, the New Wave Group already performs regular check ups of factories and products to make sure that they are all in line with environmental and health requirements. We use a minimum of flight transportation and consolidate our shipping to a great extent to minimize spill in our containers. To be members of the Clean Shipping Project is a natural step further; now we can play an active part in influencing the struggle for a cleaner shipping industry. The Clean Shipping Project is designed in a way that is in line with the New Wave Group's way of thinking and making business. The project is very hands on and more emphasis is put on action than bureaucracy.
