GENERAL CARE INSTRUCTIONS

Follow the recommended care instructions as labeled in each uniform.

GENERAL CARE INSTRUCTIONS

New Uniforms	<p>Russell recommends the following procedures be used on newly received uniforms to prepare them for use.</p> <p>Wash a medium sized load of uniforms in Cold water (80 ± 5°F) with 1-2 ounces of mild detergent (pH under 10) on an extra large laundry setting for 3 minutes and then drain. Do not overload the machine.</p> <p>Re-wash using the same settings without detergent for 3 minutes and drain.</p> <p>Re-wash again in Cold water (80 ± 5°F) with 1-2 ounces of mild detergent (pH under 10) on an extra large laundry setting for 3 minutes and drain.</p> <p>Wash a final time using the same settings without detergent for 5 minutes and drain.</p> <p>Use the Spin cycle on the washer to extract as much water as possible and tumble dry the garments using very low heat.</p>
Laundering Prep	<p>For best results and maximum wear, launder uniforms immediately after each use.</p> <p>Uniforms need to be inspected for normal wear and tear so repairs can be made prior to washing to prevent further damage.</p> <p>Close any hook and loop tape openings to prevent hook and loop from snagging material during wash.</p> <p>Remove belts and pads, if possible, from uniform before laundering.</p> <p>Do not allow uniforms to lay on itself or in a pile when wet because perspiration can cause fading or color bleeding.</p>
Pre-Treating	<p>Pretreat stains with pre-wash, stain remover or protein release agent while uniform is still damp for no more than 30 minutes.</p> <p>Do not soak uniforms containing nylon or nylon spandex blend.</p>
Washing	<p>Wash uniforms in Cold water (80 ± 5°F) as soon as possible after each use, before stains are allowed to set.</p> <p>A mild detergent (pH under 10) should be used.</p> <p>Do not overload the machine.</p> <p>Use recommended amount of detergent as per detergent manufacturer.</p> <p>Rinse uniforms in Cold water (80 ± 5°F).</p> <p>Remove uniforms from machine immediately after washing to avoid color migration.</p> <p>Do not use chlorine bleach.</p> <p>Do not use fabric softener.</p> <p>Wash white uniforms separately from colored uniforms.</p>
Drying	<p>Remove promptly from washer.</p> <p>Turn uniform reverse side out before machine drying.</p> <p>Tumble dry on low setting (< 140°F).</p> <p>Note excessive heat can cause garment shrinkage, discoloration, degradation, and cracking of lettering.</p> <p>Do not use fabric softener or dryer sheet.</p>
Storage	<p>Uniforms should be completely dry before storing.</p> <p>Store in a cool, dry place away from direct sunlight and fluorescent lighting to prevent mildew or yellowing.</p>
Dry Cleaning	<p>Do not dry clean uniforms.</p>
Ironing	<p>Do not iron uniforms</p>

SUBLIMATED UNIFORM LAUNDERING GUIDE

- Please remember that SUBLIMATED garments may be subject to dye migration due to the following reasons:**
 - From sitting wet for a prolonged period of time**
 - Prevent from sitting wet in a pile, on a bench, or in a bag after use. Hang until being laundered.
 - Prevent from sitting wet in a washer of water or in the bottom of a washer.
 - From exposure to heat over 220 degrees.**
 - The dye may be re-activated to a gas state and move onto any other part of the garment that it may touch when too hot.
 - Avoid heat whenever possible. If heat is being used for drying, please use lowest heat and remove promptly from the warm dryer.
- Since the majority of Russell Athletic uniforms are treated with a moisture management chemical, there is no need to expose the garments to heat as a part of the laundering process.**
 - Heat breaks down the garment fabric, the colors, the decoration, and the spandex fibers in the fabric.
- The suggestion is to WASH following the enclosed instructions; SPIN OUT any excess water; REMOVE from the washer; HANG on a plastic hanger to dry.**
